Mr. Bill Canney  
West Lake Quarry and Material Company  
Route 1  
Box 206  
Bridgeton, Missouri 63042

Dear Mr. Canney:

This letter is a follow up to our telephone conversation on January 18, 1978. At that time we discussed the number of discharges at the quarry and the possible combination of your two NPDES permits, number MO-0003051 and Number MO-0003093.

You have stated that there is now only one discharge at the quarry. This information has been verified by a field visit made by a representative of this office on October 26, 1977. Based on this information, it will be necessary for permit number MO-0003093 to be voided. Because this permit was originally issued by the EPA, they are responsible for terminating the permit. Please see the enclosed carbon copy of the letter requesting that this be done.

Your remaining discharge will be covered by permit number MO-0003051. This permit will expire on June 30, 1978. It is therefore necessary that you apply for a renewal. Enclosed are two forms for this purpose. Please complete both copies in detail, including specific information regarding the process in which the water is used, the size and depth of the pond, other structures which may be involved, and any other pertinent information. Please submit this data along with the required \$75.00 filing fee to this office within thirty days.

If you have any questions regarding the above, please contact the St. Louis Regional Office.

Sincerely,

Nancy Kimble

Mr. Michael Thomas  
EPA, Permit Section  
1735 Baltimore  
Kansas City, Kansas 64108

Dear Mr. Thomas:

The discharge covered by NPDES Permit Number MO-0003093 has been eliminated. This fact has been verified by a recent field check made by a representative of this office. This permit was originally issued by the EPA and has never been reissued by the State. We, therefore, request that you terminate the permit as soon as possible.

If you have any questions, please advise.

Sincerely,

Nancy Kimble  
Environmental Specialist I
